REACT	UX Research
Python	Power apps

## REFERENCE

### Sara Hedegaard

Senior IT Project Manager, Novo Nordisk  
Previously: Senior Process Consultant, AAU  
+45 26 14 86 45  
ssjk80@gmail.com

## RECENT PROJECTS

### AAU Timesheets App

The app serves as a replacement for manual registration of work hours for student workers. It replaces manual Excel timesheets with a dashboard for handling the entire process from the student, the approval flow and economics department. Improving the flow, reducing time per process and automating manual labour.

### 6th semester project - ChatRecap

ChatRecap is a tool we developed that implemented AI. It takes a recorded meeting, transcribes it and sorts the entire conversation into categories in a messenger-like interface, with tags to jump to specific topics in the meeting. Allowing non-participants to understand the meeting with non-biased notes.

## ABOUT ME

I'm a 27 year old Interaction design student, who loves to challenge himself. I'm passionate about UX, IT, and learning new concepts and technologies. I dream about being part of cool projects which help people, through well thoughtout designs, userfriendlyness and process optimization.
